

The AI Visibility System Accelerator

Quick Start Guide

How To Use Your Custom
GPTs To Easily Increase
Your Authority In The
Eyes Of AI

Introduction

Thanks for upgrading to ***The AI Visibility System Accelerator***. With this suite of Custom GPTs now at your disposal, you will be able to harness the incredible power of AI to help you implement the steps outlined in the main guide The AI Visibility System.

These are not random AI tools.

They follow ***The AI Visibility System*** exactly, each one builds on the work done by the previous one, which means ***everything*** they create is aligned, consistent and built in exactly the right format - so every signal you create connects properly with every other one.

Used properly, this quite simply means that ***you*** will be the expert who is discovered by AI... rather than someone else.

In order to increase your AI authority, there are a series of steps as set out in the main guide.

IMPORTANT NOTE:

If you haven't read it yet, please do now before you continue.

*Even if the GPT does most of the work for you in the background, understanding ***why*** will make everything that you are being asked to do make much more sense, and you will get better results.*

I have created a custom GPT to handle each one of the steps for you. I will list them below, but to start with you really only need the first one - once you run it, it will tell you what you need to do next, and which app to use to do it.

First, if you haven't already got one, sign up for a Chat GPT account [here](#)

The free one is fine, you do not need to have a paid account to use these.

Then go to the first App

AI Visibility System Navigator

This is your starting point and will take you to whatever step you want to complete next.

You should see something like this.

AI Visibility System Navigator

By VAL WILSON 🧑

Shows you where to start and guides you step-by-step through 'The AI Visibility System' so you always know what to do next - and exactly which app to use

Click here to
get started!

Click the 'Click here to get started!' button and simply follow the instructions.

When you let it know what stage you are at it will tell you what you need to do next, and link you to the correct app to help you do it.

In most cases to start with you will not have completed any of the steps, but that's fine - that's exactly why you got a copy of ***The AI Visibility System***, to put that right 😊

Whenever you have completed the first step, then come back to the ***AI Visibility System Navigator*** app and it will tell you what's next.

If you are using the Navigator app you'll generally not need to go direct to the other apps, but I have linked to them all below in any case.

1. AI Identity Builder

Each of these corresponds to the steps in the main guide. For Step 6 (Reinforcement) just go back to whichever GPT you need.

I have tried to make everything in the apps as simple and self-explanatory as possible. But if anything is unclear, if you have any questions or I can help in any way, contact me anytime at support@ticketymarketing.com

I am more than happy to help you in any way I can to make the most of this opportunity.

Look forward to finding you in the AI search results 😊
